- [Steps during maintenance window](#)
 - [Automate purging of old partitions.](#)

Pre-release steps

Create new partitioned table by date range (monthly) using interval partitions. create same index with (created_date) using below code

[create_psp_entity_update_part.sql](#)

Validation

```
select table_name, partition_name, high_value, tablespace_name from dba_tab_partitions where table_owner = 'PSPADM' and table_name = 'PSP_ENTITY_UPDATE_PART';
```

Copy last 30 days data (till 01-Dec-2022)

- Copy last 30 days records into newly created partitioned table via [copy_latest_month_data.sql](#)

Steps during maintenance window

- Downtime of application
- get current invalid objects in PSPADM schema

```
SELECT
  owner,
  object_type,
  object_name
FROM
  dba_objects
WHERE
  owner = 'PSPADM' and
  status = 'INVALID'
ORDER BY
  object_type,
  object_name;
```

- Copy latest 1 day data (02-dec-2022)
- Change dates and generate insert statements accordingly using below and commit.

```
insert into PSPADM.PSP_ENTITY_UPDATE_PART select /*+ PARALLEL(8) */ * from PSPADM.PSP_ENTITY_UPDATE where
created_date>= to_date('02-12-2022 00:00:00','DD-MM-YYYY HH24:MI:SS') and created_date< to_date('02-12-2022 12:
00:00','DD-MM-YYYY HH24:MI:SS') ;
insert into PSPADM.PSP_ENTITY_UPDATE_PART select /*+ PARALLEL(8) */ * from PSPADM.PSP_ENTITY_UPDATE where
created_date>= to_date('02-12-2022 12:00:00','DD-MM-YYYY HH24:MI:SS') and created_date< to_date('03-12-2022 00:
00:00','DD-MM-YYYY HH24:MI:SS') ;
```

- Rename current table as **_HIST**

```
alter session set current_schema=pspadm;

alter table PSP_ENTITY_UPDATE rename to PSP_ENTITY_UPDATE_HIST;
```

- rename new partitioned table to actual table name

```
ALTER TABLE PSP_ENTITY_UPDATE_PART RENAME TO PSP_ENTITY_UPDATE;
```

- create synonym and grant permissions

```
create or replace synonym pspapp.PSP_ENTITY_UPDATE for pspadm.PSP_ENTITY_UPDATE;

grant select,insert,update,delete on pspadm.PSP_ENTITY_UPDATE to pspapp;
grant select on pspadm.PSP_ENTITY_UPDATE to datalake;
```

- get current invalid objects in PSPADM schema and fix synonyms

```
SELECT
    owner,
    object_type,
    object_name
FROM
    dba_objects
WHERE
    owner = 'PSPADM' and
    status = 'INVALID'
ORDER BY
    object_type,
    object_name;
```

- Ensure Goldengate replication is working without any issue
- Trigger entity event job to ensure

Automate purging of old partitions.
