

DB password change Runbook

1. Context

As part of Intuit's SOX and internal security policy compliance requirements, all non-human account passwords (i.e. System/Service Accounts) identified on SOX in-scope systems must be refreshed at least once a year. This is a mandatory compliance requirement except where extreme technical constraints and unknowns prevent the password from being reset.

2. Action Items

Pre Prod

	Task	Steps	Status	Owner	Remarks
1	Take Backup of Old credentials via script	Modules: PSP/PAPI/Pubsub/QueryConsole stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/secrets/AWSSYS/dataAccess-password --output ./dataAccess-password-bkup --overwrite --utf-8 Module: PSP <u>Secondary DB credentials backup:</u> stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/secrets/AWSSYS/dataAccessSecondary-password --output ./psp-dataAccessSecondary-password-backup.txt --overwrite --utf-8 RJF: stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/reportjob-secrets/sysaws/datasource-password --output ./rjf-datasource-password-bkup --overwrite --utf-8 Payroll DM: No QAL Env	DONE	Sandeep	
2	Ensure all services have 0 Pods running	☒ PSP ☒ RJF ☒ Pubsub ☒ PayrollDM ☒ PAPI ☒ QueryConsole	DONE	Vishwa /Praveen	
3	change password in PSP database (monolith + IBOB) in US-WEST-2 and US-EAST-2 region		DONE	Mayank	users : PSPADM, PSPAPP, PSPREAD_AWS, IBOB_PROD_PSPAPP, IBOB_PROD_PSPREAD, IBOB_PSPREAD_AWS, IBOBADM With this, we also had to change few other users as mentioned below (in Green)

4	manual SQL connectivity verification	Application used below users only. Verification will be done for all users whose password is changed. 1. PSPAPP, PSPREAD_AWS IBOB_PROD_PSPAPP 2. PSPADM, IBOB_PROD_PSPREAD, IBOB_PSPREAD_AWS, IBOBADM	DONE	Mayank	
5	sync IDPS with new password via scripts - PSP + RJF (4 keys need to be updated)	Modules: PSP/PAPI/Pubsub/QueryConsole Insert: <pre>stash put-secret --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --api-key-file-path key_v2-b95a8179f0779.pem --secret-name PSPSecrets/secrets/AWSSYS/dataAccess-password --secret-value dataAccess-password.txt --utf-8 --trim</pre> Verify: <pre>stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/secrets/AWSSYS/dataAccess-password --output ./verify-dataAccess-password --overwrite --utf-8</pre> Module: PSP/Pubsub <u>Secondary DB credentials backup:</u> Insert: <pre>stash put-secret --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --api-key-file-path key_v2-b95a8179f0779.pem --secret-name PSPSecrets/secrets/AWSSYS/dataAccessSecondary-password --secret-value dataAccessSecondary-password.txt --utf-8 --trim</pre> Verify: <pre>stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/secrets/AWSSYS/dataAccessSecondary-password --output ./verify-dataAccessSecondary-password.txt --overwrite --utf-8</pre> RJF: Insert: <pre>stash put-secret --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --api-key-file-path key_v2-b95a8179f0779.pem --secret-name PSPSecrets/reportjob-secrets/sysaws/datasource-password --secret-value rjf-datasource-password.txt --utf-8 --trim</pre> Verify: <pre>stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/reportjob-secrets/sysaws/datasource-password --output ./verify-rjf-datasource-password --overwrite --utf-8</pre> Payroll DM: (QAL env not available,Only E2E) primary-datasource: Insert: <pre>stash put-secret --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --api-key-file-path key_v2-b95a8179f0779.pem --secret-name PSPSecrets/reportjob-secrets/devaws/datasource-password --secret-value payrolldm-datasource-password.txt --utf-8 --trim</pre> Verify: <pre>stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/reportjob-secrets/devaws/datasource-password --output ./verify-payrolldm-datasource-password.txt --overwrite --utf-8</pre> secondary-datasource: Insert: <pre>stash put-secret --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --api-key-file-path key_v2-b95a8179f0779.pem --secret-name PSPSecrets/secrets/AWSSYS/dataAccessSecondary-password --secret-value payrolldm-dataAccessSecondary-password.txt --utf-8 --trim</pre> Verify: <pre>stash get --api-key-file-path key_v2-b95a8179f0779.pem --appliance PayrollSvcPlatform-PRE-PRODUCTION-N93C09.pd.idps.a.intuit.com --secret-name PSPSecrets/secrets/AWSSYS/dataAccessSecondary-password --output ./verify-payrolldm-dataAccessSecondary-password.txt --overwrite --utf-8</pre>	DONE	Sandeep	
6	Deployment - PSP	Verify that the pod count is 1 via ArgoCD and check it is using new DB connection with DB team Once Autoscaling is set to normal,verify all pods have come up and they are in healthy state	DONE	Sandeep /Shiplu	
7	Deployment of PubSub		DONE	Ram	
8	Restart - RJF, PAPI, Query Console, Payroll DM		DONE	Vishwa /Praveen	

9	During deployment ensure existing db connections are gone and starts making new connections.		DONE	Mayank	
10	PSP Sanity	Verify POD count is same as expected. Verify POD health is stable. Verify Build Version	DONE	Sandeep /Shiplu	
11	PubSub Sanity		DONE	Ram	
12	RJF, PAPI, Query Console, Payroll DM Sanity		DONE	Praveen /Vishwa
