PSP production database set up

PSP db environments and respective configuration

- prod

Oracle

	environment	db instance name	db name	db schema name	notes
1	Production (US-WEST-2)	psphpp02	psphpp02	PSPADM	getting replicated from postgres for rollback (Oracle Exit)
2	Production Veridata	pspvd1pt	pspvd1pt	N/A	

Aurora Postgres

	Environment	db instance name	db name	db schema name	notes

1	Production	psp-prod-uw02	pspapg02	PSPADM	Parallel /Staging : Postgres : Hostname : ppsp-stg-pitparmo. cluster-cjls0bohfgpq.us-west-2.rds. amazonaws.com port: 5432 dbname: pitparmo schema: pspadm username: psp_prl_app
2	Production	psp-prod-ibob	prodapgib	IBOBADM	Parallel /Staging : Aurora Postgres hostname: psp-par-aud. cluster-cjls0bohfgpq.us-west-2.rds. amazonaws.com Port: 6543 database name: parapgib schema: ibobadm username: ibob_prl_app
3	DB Archival				Parallel /Staging : Hostname: ppsp-stg-arc.cluster-cjls0bohfgpq.us-west-2.rds. amazonaws.com port: 5432 dbname: psparcdb schema: psparcdb username: psparcapp

Non prod

Oracle

	environment	db instance name	db service name	db schema name	remarks
1	pds	ppsphp01	ppsphp01	pspadm	
2					

Aurora Postgres

	Environment	db instance name	db name	db schema name	remarks
1	Monolith SYS	ppsp-sys-mon	psyspg01	pspadm	
2	Monolith PDS	ppsp-pds-uw02	ppdspg02	pspadm	
1	Audit SYS	spsp-sys-db	sysibobdb	ibobadm	Parallel SYS Postgres DB: hostname: par-sys-apg. cluster- ccqjgvvo0rwy .us-west-2. rds. amazonaws. com Port: 5432 database name: parsysapg, Username : ibob_prl_psp app, schema : ibobadm database name: parsysapg01, Username : ibob_prl_psp app_01, schema : ibobadm
2	Audit PDS	ppsp-pds-db	pdsibobdb	ibobadm_pds	
3	Mock Client	pspmock-dev-mock	mockclie nte2e, mockclie ntprf	mockclientadm	
4	Data Archival monolith	ppsp-ppd-arc	psppdarc	psparc	

Note:

Monolith:

pspds001 : holds schemas/users for DS1, DS3, DS5(future if required)

pspds002 : holds schemas/users for DEV, DS2, DS4(future if required)

IBOB :

pspiibob1 : holds schemas/users for PDS, DS1, DS3, DS5(future if required)

pspiibob2 : holds schemas/users for DEV, DS2, DS4(future if required)

psppfib1 : This also has veridata repository schema.
